## MLAR STATISTICS TABLES

### Notes on the basis of our numbers of loans, arrears and possession cases

#### Number of loan accounts:

Represents the number of individual loan accounts, and covers:

- *1st charge loans*
- *2nd and subsequent charge loans (where the borrower takes an extra loan from another lender)*
- *some further advance loans*. This applies in cases where a 1st charge lender grants a further advance on the original mortgage, but for administrative purposes treats it as a separate loan account.

This is also influenced by MLAR monitoring regulated loans and non-regulated loans separately. As a consequence of this, most 2nd charge loans go into a separate reporting category (non-regulated).

As a result, our "number of loan account" figures are on a different basis to, and materially higher than, those published by CML on numbers of mortgages.

#### Number of loan accounts in arrears:

This number does not represent the number of borrowers in arrears.

It represents the number of individual loan accounts in arrears, and covers arrears arising on:

- *1st charge loans*
- *2nd and subsequent charge loans (where the borrower takes an extra loan from another lender)*
- *some further advance loans*. This applies in cases where the 1st charge lender establishes a further advance on the original mortgage as a separate loan account, but is unable to combine the two accounts for MLAR arrears reporting purposes.

As a result, our arrears numbers are on a different basis to, and materially higher than, those published by the CML on number of *1st charge mortgages in arrears*. As such, the CML measure is more a measure of the number of borrowers in arrears. More importantly however, our reporting threshold for arrears is "loan accounts where arrears amount to 1.5% or more of loan balances", in contrast to CML's which is 2.5%, and so our "numbers" will always be materially higher as they cover a wider spectrum.

### Number of possession cases

This number does not represent the number of borrowers that have been subject to possession

It represents the number of individual loan accounts in possession, and covers possessions arising on:

- *1st charge loans*
- *2nd and subsequent charge loans (where the borrower takes an extra loan from another lender)*

In practice however, where a borrower has 1st and 2nd charge loans with separate lenders, it will not always be the case that both lenders report their loan accounts as a possession. So our possession figures will be closer to, but necessarily still somewhat higher than, CML estimates.
