FCA Warning List Widget

The Warning List widget is a simple method of embedding an adapted version of the FCA Warning List tool into another website. It presents the Warning List logo, introduction text and form on a FCA maroon background.

FCA Warning List

The Warning List is an online tool that warns users of the risks associated with an investment and helps them to check a list of firms the FCA knows are operating without its authorisation.

Access Widget

The widget is available at <https://www.fca.org.uk/scamsmart/warning-list/widget>

Interaction

When a user fills in the form and clicks on the arrow button, they are taken to the second page of the main FCA Warning List website. If they have made a mistake in the form, they are taken to the FCA Warning List homepage where they are prompted to correct their mistake.

Embedding

The widget should be embedded into a page using an iframe. It is designed to adapt to the size of its container, expanding to fill both horizontal and vertical space, but should not be used in containers with a width of less than 150px.
